Art Unit: 2823

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/3/06 has been entered.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 68,69,74,75 and 83-91 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description in the disclosure as originally filed of forming the resin film as recited. Note figures 5B wherein resin film 945 is formed to contact wiring 937/938, for example.

Claims 50-53,56,57,62,64,65,67,76-80 and 82 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in combination with Yamada '179, Inoue et al '206, So et al '905, Garcia et al, Farber et al '684 and further in view of Satoh et and Sakaa et al '584.

The rejection is maintained as stated in the office action mailed 9/2/05.

Applicant argues that Satoh does not disclose a film corresponding the the resin insulating film because the film 5 of Satoh is patterned before forming protective film 10. However, the claims do not require forming the protective film before patterning the resin film. Also note claim 52 which was not amended to require moving the substrate at particular point(s) in the process. Applicant is also directed to col.1 of Sakata as pointed to in the advisory action mailed 10/21/04 containing disclosure of storage of intermediate products in production of LCD devices.

Claims 54,55,63,66,70-73,79 and 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in combination with Yamada '179, Inoue et al '206, So et al '905, Garcia et al, Farber et al '684 and further in view of Satoh et and Sakaa et al '584 as applied to claims 50-53,56,57,62,64,65,67,76-80 and 82 above, and further in view of Montgomery et al.

The rejection is maintained as stated in the office action mailed 9/2/05.
